Dear Patient:

We are excited to announce the **Pharmanex Antioxidant Laser Scanner** will now be a part of the services we offer to address your overall health care. Knowing your antioxidant level is as important as knowing your cholesterol levels, or your blood pressure.

Current medical literature suggests that antioxidants can decrease your risk of cancer, heart disease, and complications related to diabetes.

Antioxidants can slow down the aging process, boost your immune system, and speed recovery times while decreasing pain and inflammation. Since most Americans do not eat 8-12 servings of fruit and vegetables daily, it is important that you take a vitamin supplement that can provide optimal nutritional support and effectively raise your overall antioxidant level.

In the past we have been reluctant to make specific vitamin recommendations because most products are poorly absorbed and ineffective. We now have access to a new technology called the **Pharmanex BioPhotonic Scanner**, which enables us to provide a noninvasive, painless, accurate, and low cost assessment of your nutritional status. We would like to implement this assessment as part of your preventative care, so we may recommend appropriate nutritional supplements to assist you in maintaining better health. Safety and scientifically backed recommendations are of utmost importance and will parallel the standard of care you have come to know from us.

We fully endorse the **Pharmanex BioPhotonic Scanner** Program and the **Pharmanex** family of products.

LifePak Nano is the most **effective and comprehensive dietary supplement** available. **Pharmanex** conducts the most in depth research, uses the most advanced science, and the highest quality ingredients that are available in order to produce superior products.

Scans will be offered for \$20. Should your Antioxidant level be low, we will show you how to increase your Antioxidant defenses simply, effectively, measurably, **and guaranteed.** (money back if not improved) We have a special arrangement with Pharmanex that allows you to buy the product through our office, delivered to your home, at the lowest available price. Comprehensive nutritional support programs range from \$1 to \$3 per day. Let us show you how you can afford to use supplements to practice 'Prevention' and live a healthier life!

In addition,

Keep in mind that an ounce of prevention is worth more than a pound of cure!

If you are presently taking supplements, the Scanner will assess the antioxidant effect that it is having. Let's see if you are getting your money's worth!

Sincerely,

Alan J. Barcomb, MD FAAFP
